

What's New in ArcGIS 10.0?

ArcGIS 10 adds powerful tools and simplified workflows designed to increase your productivity. This includes a number of significant changes to the interface and tighter integration of ArcMap, ArcCatalog, and Python scripting to make data visualization, analysis, and map production faster and easier. We'll expose you to the major enhancements in mapping, editing, analyzing and documenting your work, including hands-on exercises.

2-days highlighting the major changes and enhancements:

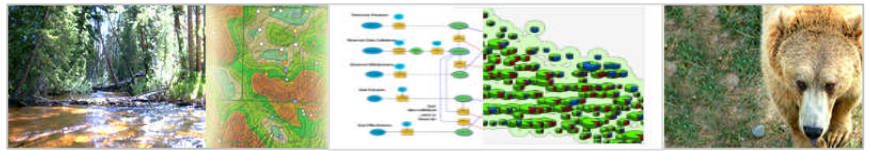

- Quickly access data, maps, and geoprocessing tools in ArcMap using the Catalog and Search window
- Apply new streamlined and sketch-based editing workflows
- Create and edit feature geometry and attributes
- Create professional-quality maps using basemaps, operational layers, and new styles and symbols
- Explore temporal mapping / time aware and 3D data
- Use Python scripts (wow!) from ArcMap to automate common geoprocessing tasks
- Quickly produce a map series using data-driven pages

ArcMap

- Catalog window
- Searching for data, maps, and tools
- Symbology enhancements
- Working with tables
- Other interface improvements

Geoprocessing and analysis

- Geoprocessing menu
- Background processing
- Python integration in ArcMap
- Raster calculator changes
- Geoprocessing Resource Center

Creating and editing data

- Editing workflow
- Feature templates
- Snapping environment changes
- Feature construction tools
- Updating attributes

Creating and sharing maps

- Basemaps and operational layers
- Working with the Style Manager
- Visualizing temporal data
- Working with 3D data and imagery
- Producing map books using data driven pages

Documenting your work

- Metadata versus item descriptions
- Accessing, creating, and editing item descriptions

Here's what your FS colleagues say about our classes:

*Your instructors were outstanding.
Best class I've had in 10 years!
The class exceeded my expectations.
We were exposed to many new tools and concepts.
Great use of questions and scenarios in class!
Great use of demos and examples in class.
Excellent and enjoyable! I learned a ton.
I was amazed that your instructors aren't ex Foresters
Wow, they so get it. THANKS!*
